HMI / SCADA

This course, as delivered by Volt Edge covers the setting up and configuring human machine interface and industrial networks for process control systems to meet performance standards. This unit encompasses the adoption of process control schemes that meet safety and process requirements, selection of control equipment and interconnecting cabling and tubing/piping based on calculated and deemed-to-comply arrangements.

-  This course is available in an online environment at a self pace.
-  Learn essential knowledge, such as: Setup/configure industrial networks, and select interconnecting cabling and tubing/piping.
-  Upon completion of this course, participants will receive a Statement of Attainment. This is a Nationally Accredited Course.
-  Qualify in the following unit of competency: UEENEEI113A - Setup and configure Human-Machine Interface (HMI) and industrial networks.
